

“Swachhta Pakhwada” Celebration at ICAR-NIHSAD, Bhopal (Dec. 29, 2021)

Dr. H.V. Murugkar, the institute's Principal Scientist, gave a talk on 'India's plastic waste problem and its mitigation solutions' as part of today's activities. This talk was related to the Swachhta Pakhwada program's concept. He spoke with NIHSAD staff during this session and outlined in detail the numerous types of plastic wastes created from various sources, as well as how they can be properly handled and safely disposed of. He also described how we might reduce our regular use of plastic items and thus assist to reduce the amount of plastic in our environment. Aside from that, the institute campus was cleaned on a regular basis.
