

Training program on “Biosafety and Biosecurity for handling and identification of emerging zoonotic pathogens” sponsored by DBT

Second Phase: 3rd to 8th August, 2016

The inaugural function of second phase of Training program on “Biosafety and Biosecurity for handling and identification of emerging zoonotic pathogens” organized as part of DBT-Pathogen discovery Program under DBT-NER Advanced Animal Diseases Diagnosis and Management Consortium (ADMAC) was held at NIHSAD. Participants from various North Eastern States will be trained during the program. The first phase of the training program was completed in July, 2016.

The Director, ICAR-NIHSAD address the participants.
