## ANNEXURE – VII

### Technical Specifications

#### Bio-containment individually ventilated cage system with fittings

**General:** Supply, Installation, Testing and Commissioning of “Mobile, Individually Ventilated Caging Systems (IVC) for housing rats/ guinea pigs /hamsters and respiratory virus challenged animals under negative bio-containment conditions with bottle type drinking water arrangement.

#### **Air Handling Unit-**

1. Stand-alone type, capable of handling a minimum of 24 to a maximum of 48 cages.
2. HEPA filters and pre filters should be fitted on both supply and exhaust systems of AHU and the efficiency level of the filter should be 99.999 % to prevent the entry of particles of more than 0.3micron size. HEPA filters should be DOP tested.
3. Air handling unit of the BCU should provide minimum 60 or more Air change/ hour.
4. The system should have built in safety devices/ alarm indicating system failure, filter choking etc. It should have ability to signal alarms when temperature and relative humidity, supply airflow, exhaust airflow, air pressure etc., conditions set up by operator are breached. There should be a mechanism whereby a SMS and email is received indicating system failure. Or software supported system to retrieve data with help of external device like pendrive etc.
5. Provision for real time display of critical parameters like temperature, relative humidity, number of air changes per hour (ACH) etc. Also display HEPA life indicator as “%age” for HEPA filter life.
6. There must be a provision to discharge the exhaust HEPA filtered air out of the room via a thimble connection directly with the room exhaust. All the fittings and workmanship for the same will be in the scope of supplier. All the joints should be sealed airtight with silicon or equivalent sealant. The exhaust connections need to be tested for any leakages on site. All the relevant tests need to be done in the presence of technical team of the institute.
7. The IVC system should be capable of providing constant high negative pressure inside the cage to provide safe environment for the operators.
8. Noise level generated by the equipment should be less than 50 dBA.

#### **Cages and Bottles: (A minimum of 48 to be included in the quote)**

1. Cages should be made of Polysulphone material with clarity/transparency capable of bearing frequent autoclave cycles. Caging accessories like cover grills, water bottles, label holders etc. should be included.
